

Zettle Reader 2 | Tipping flow – Total amount

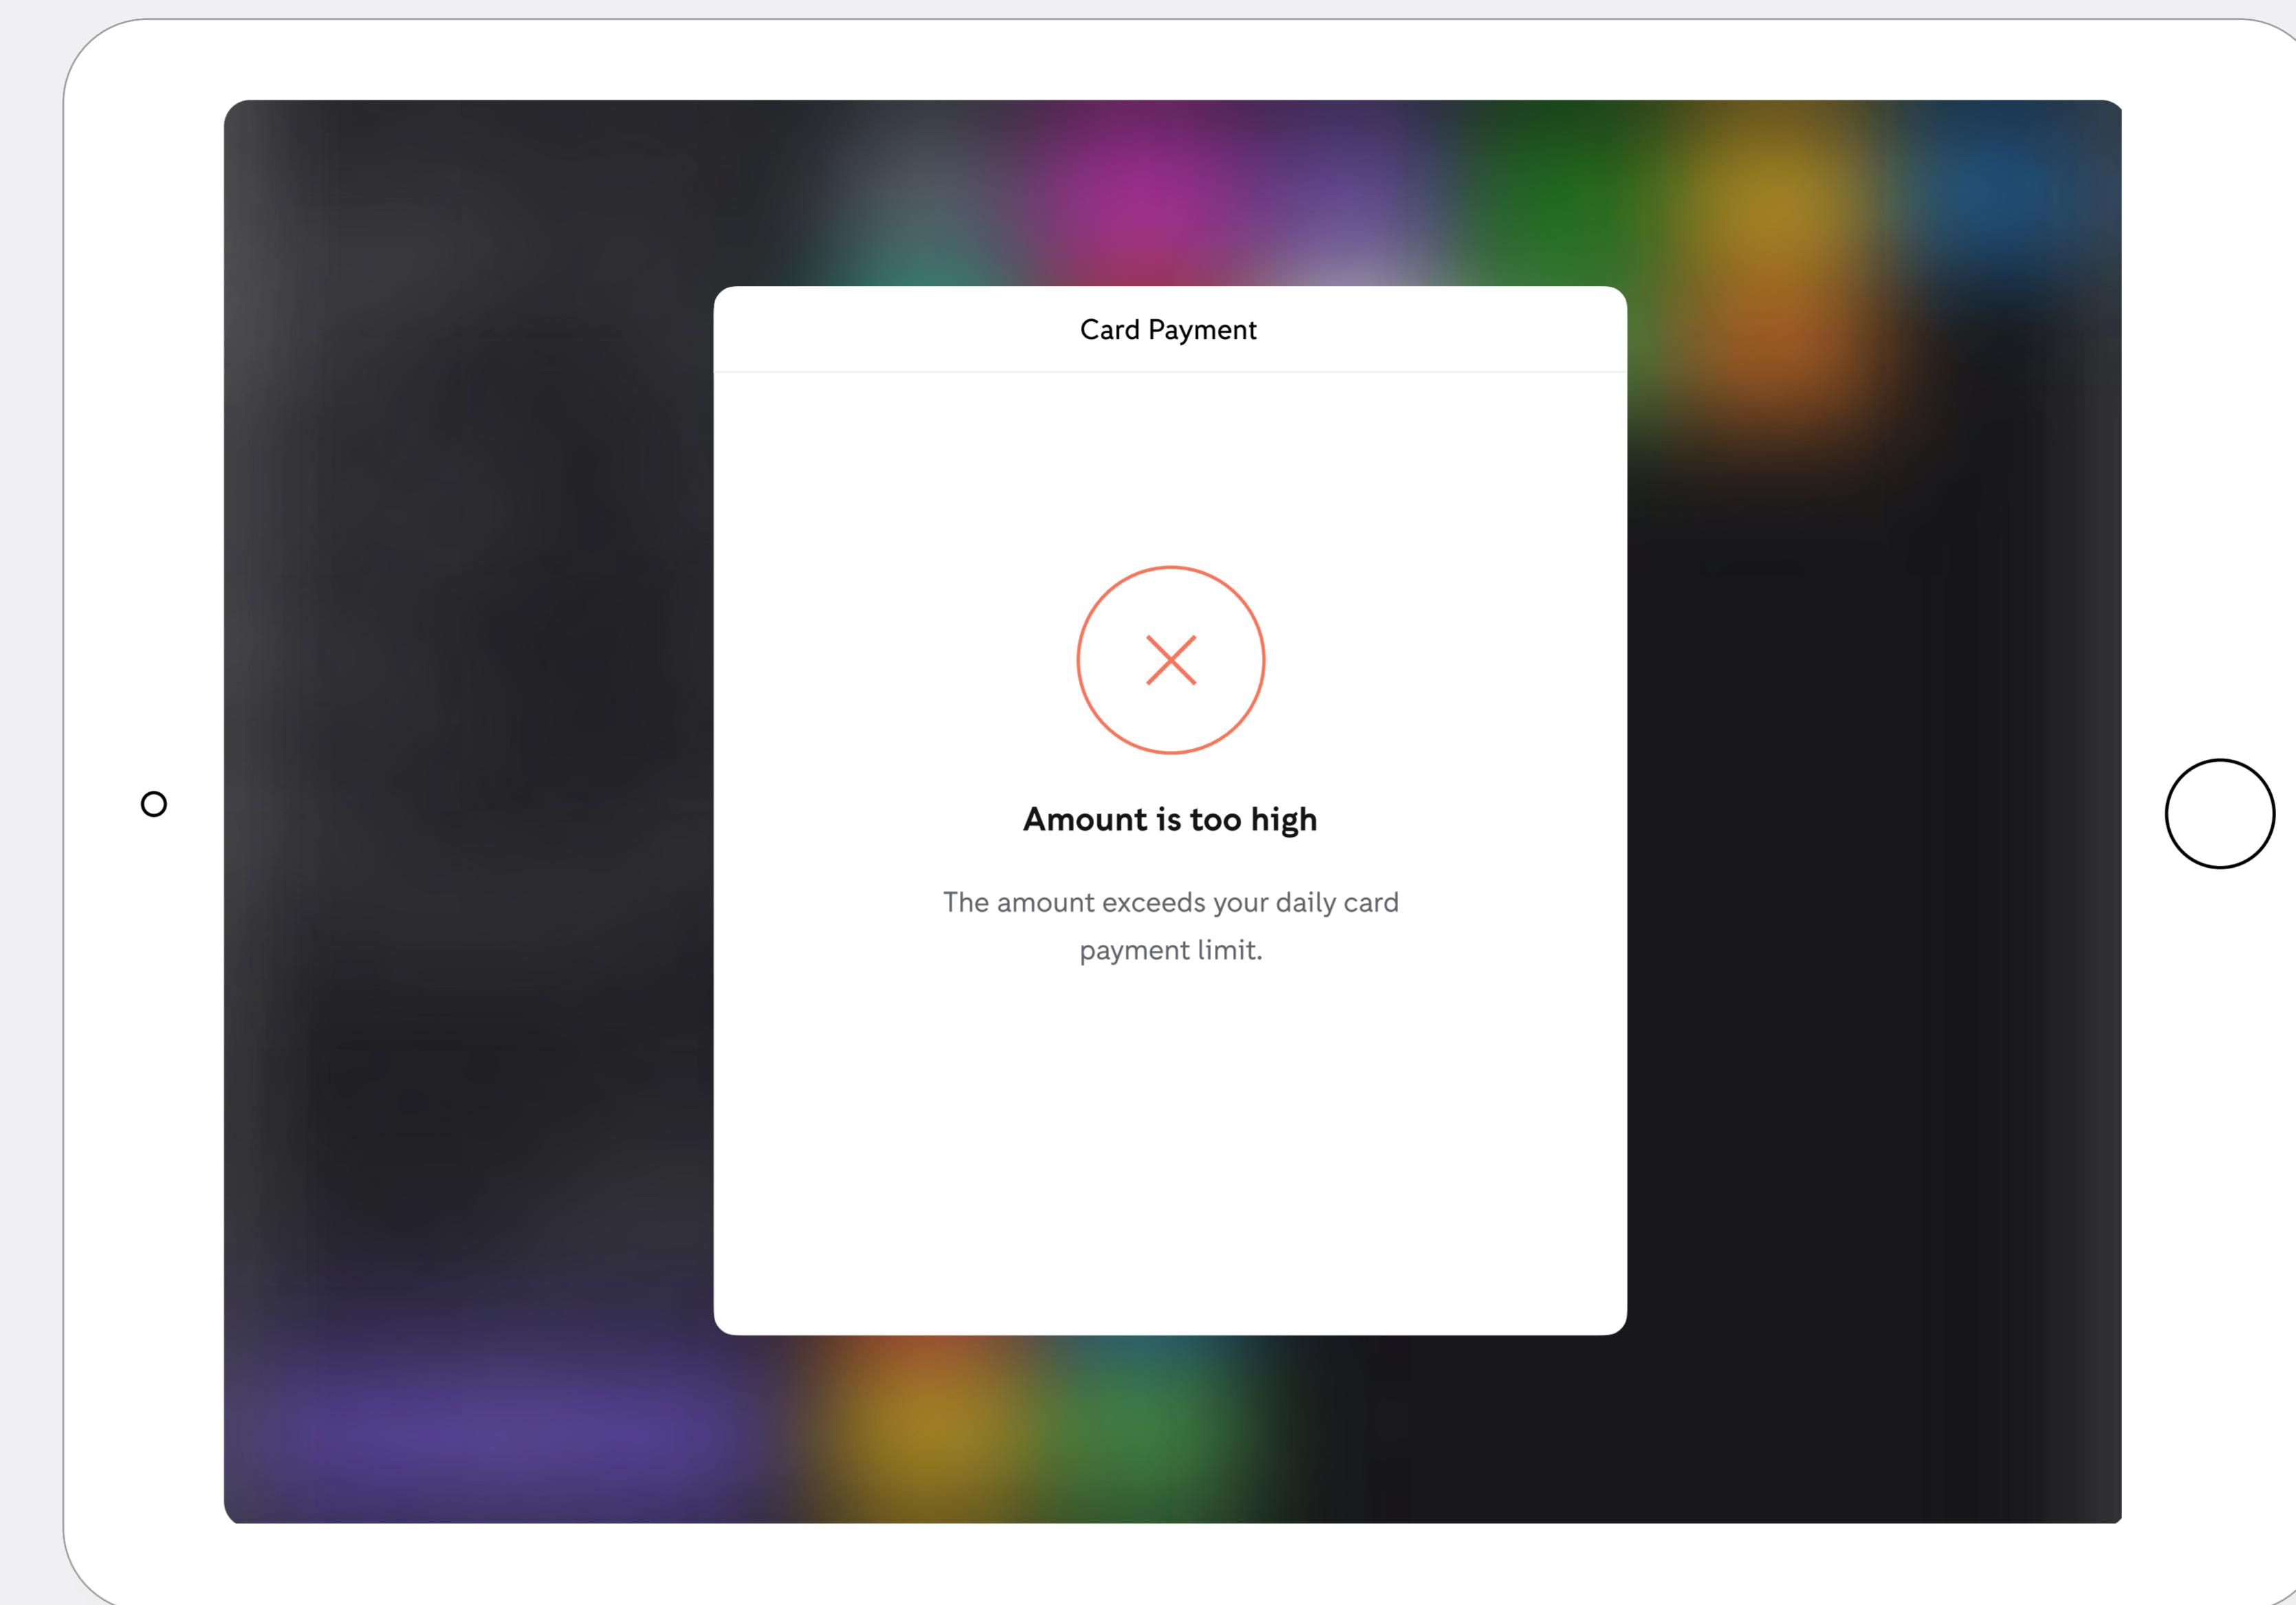

Tip added, tap card.

Too high amount

MAX level for tip

To prevent accidental or invalid amounts (for example if the customer enters their PIN code instead of a tip amount), the maximum tip level is set to 35%. If the customer enters more than 35%, the card reader will show a “too high amount” warning message.

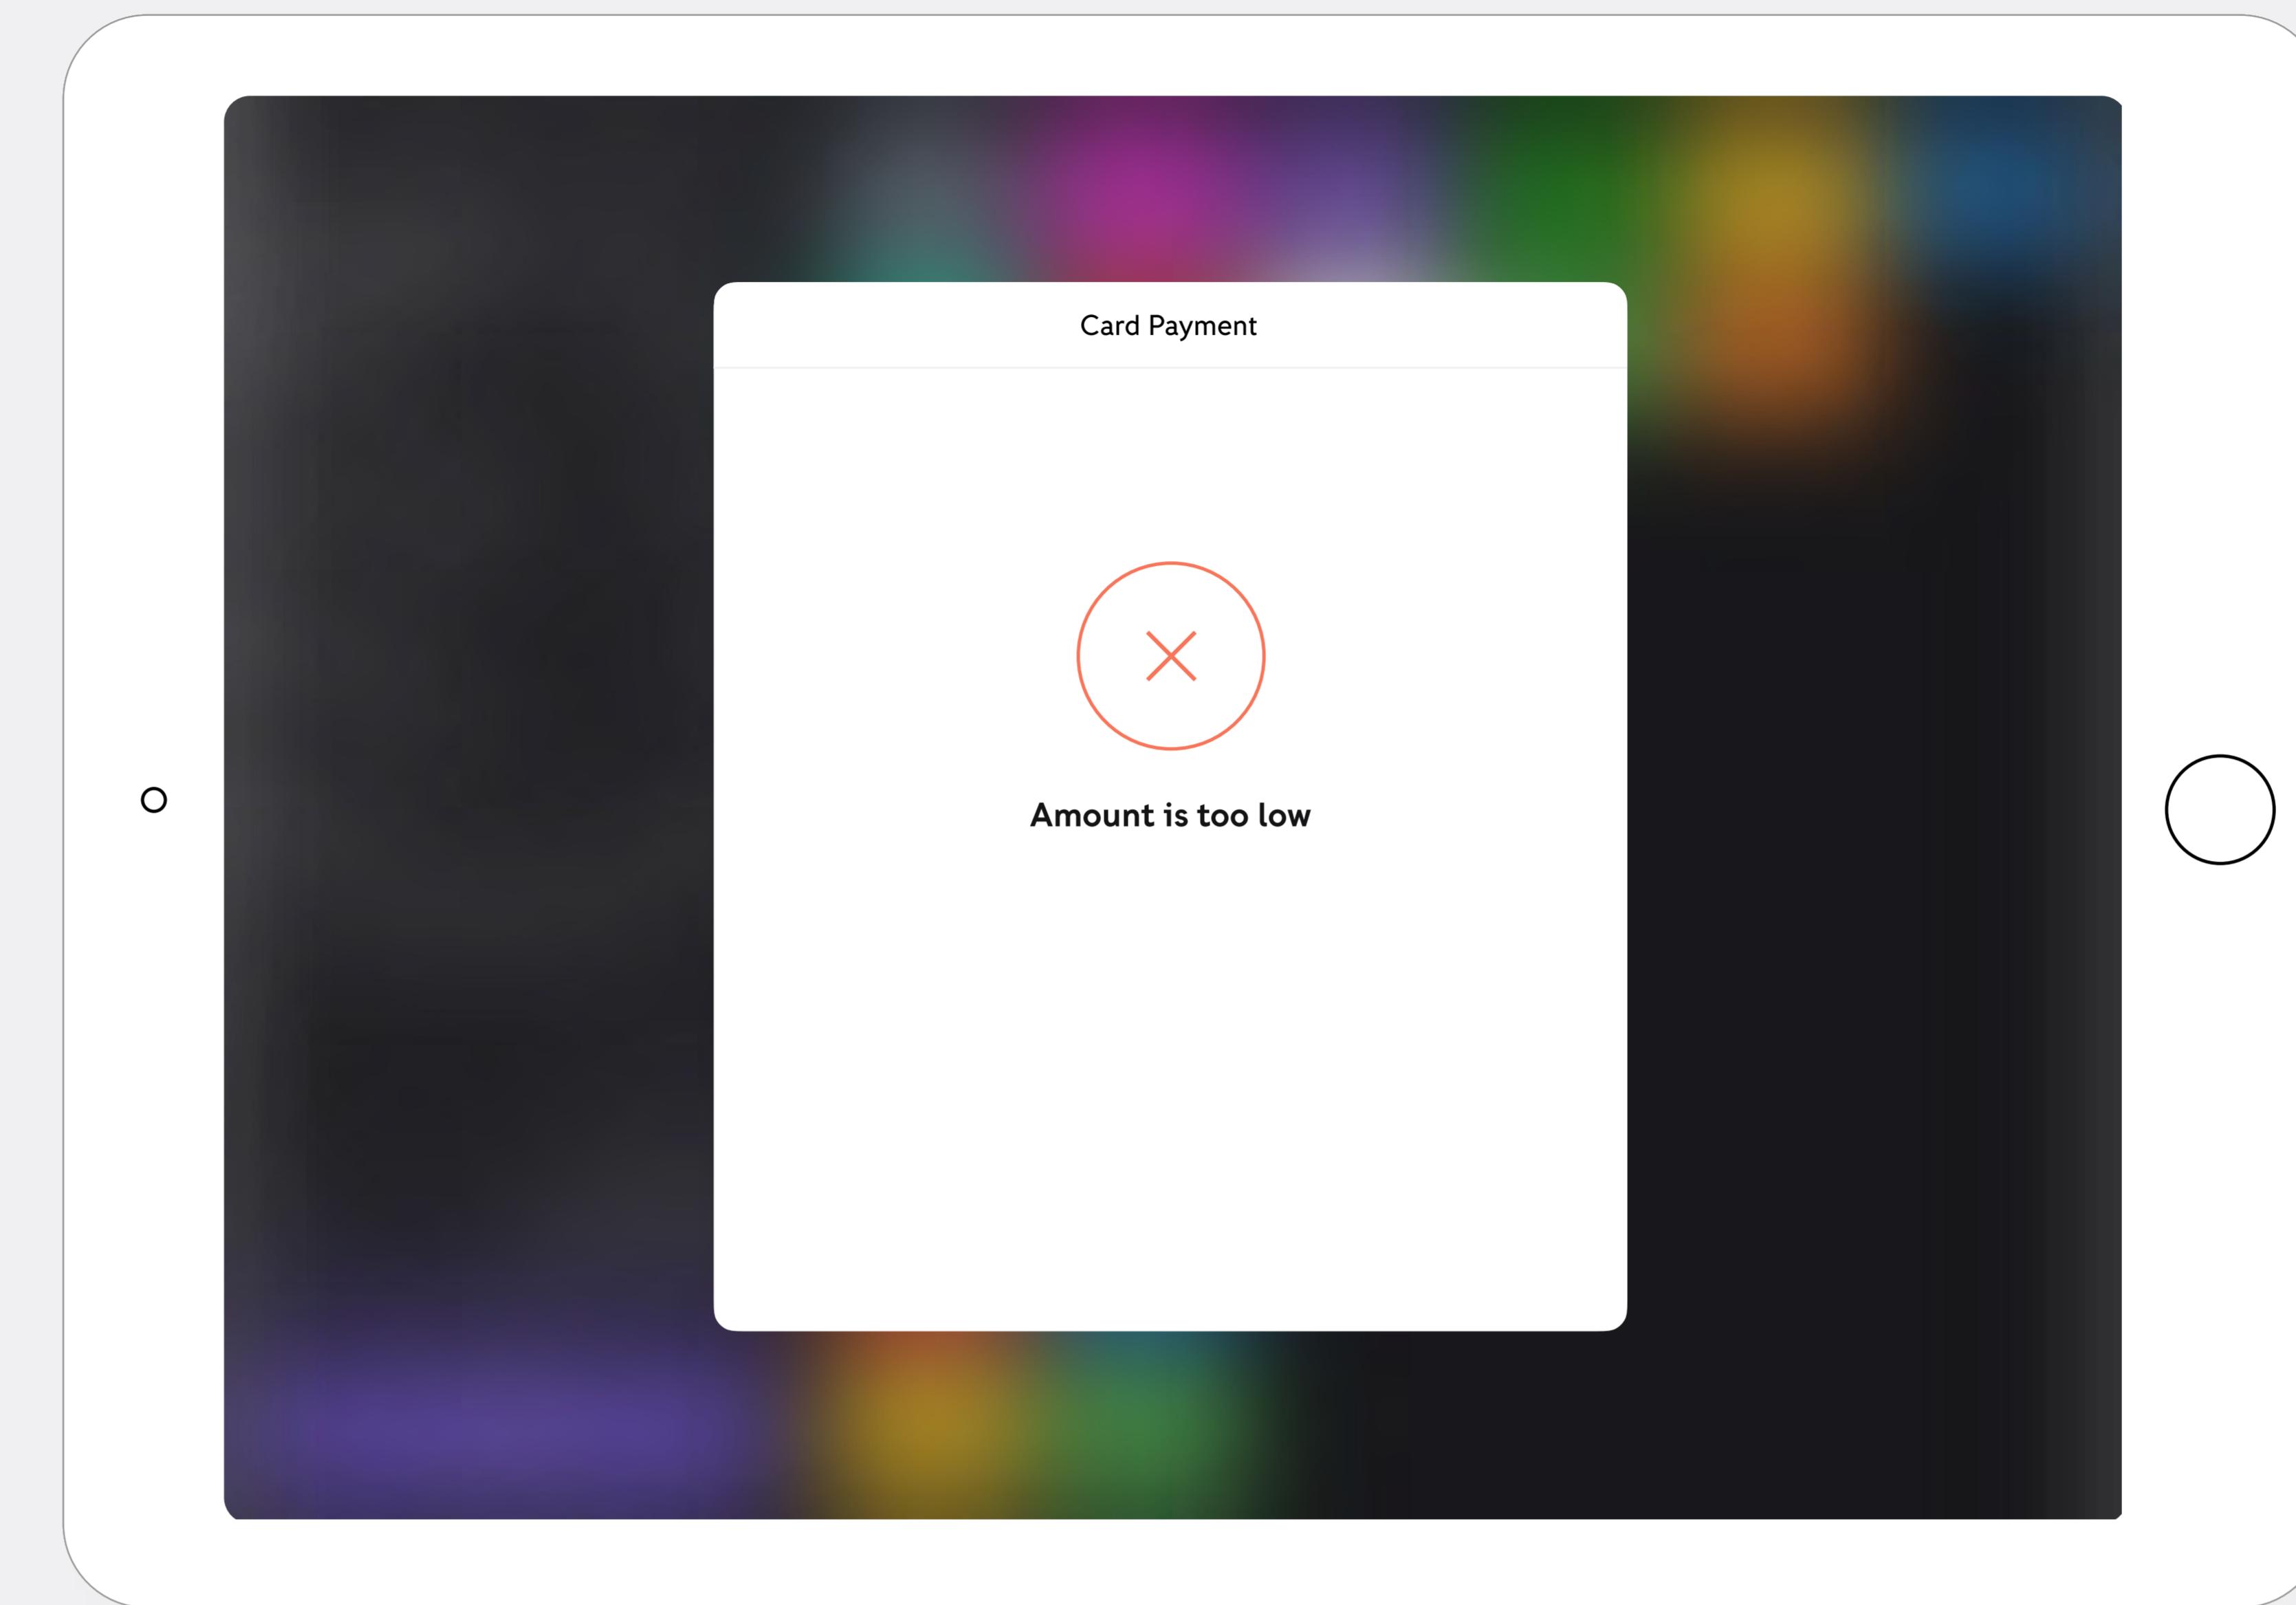

Warning message, time out after 3 sec.

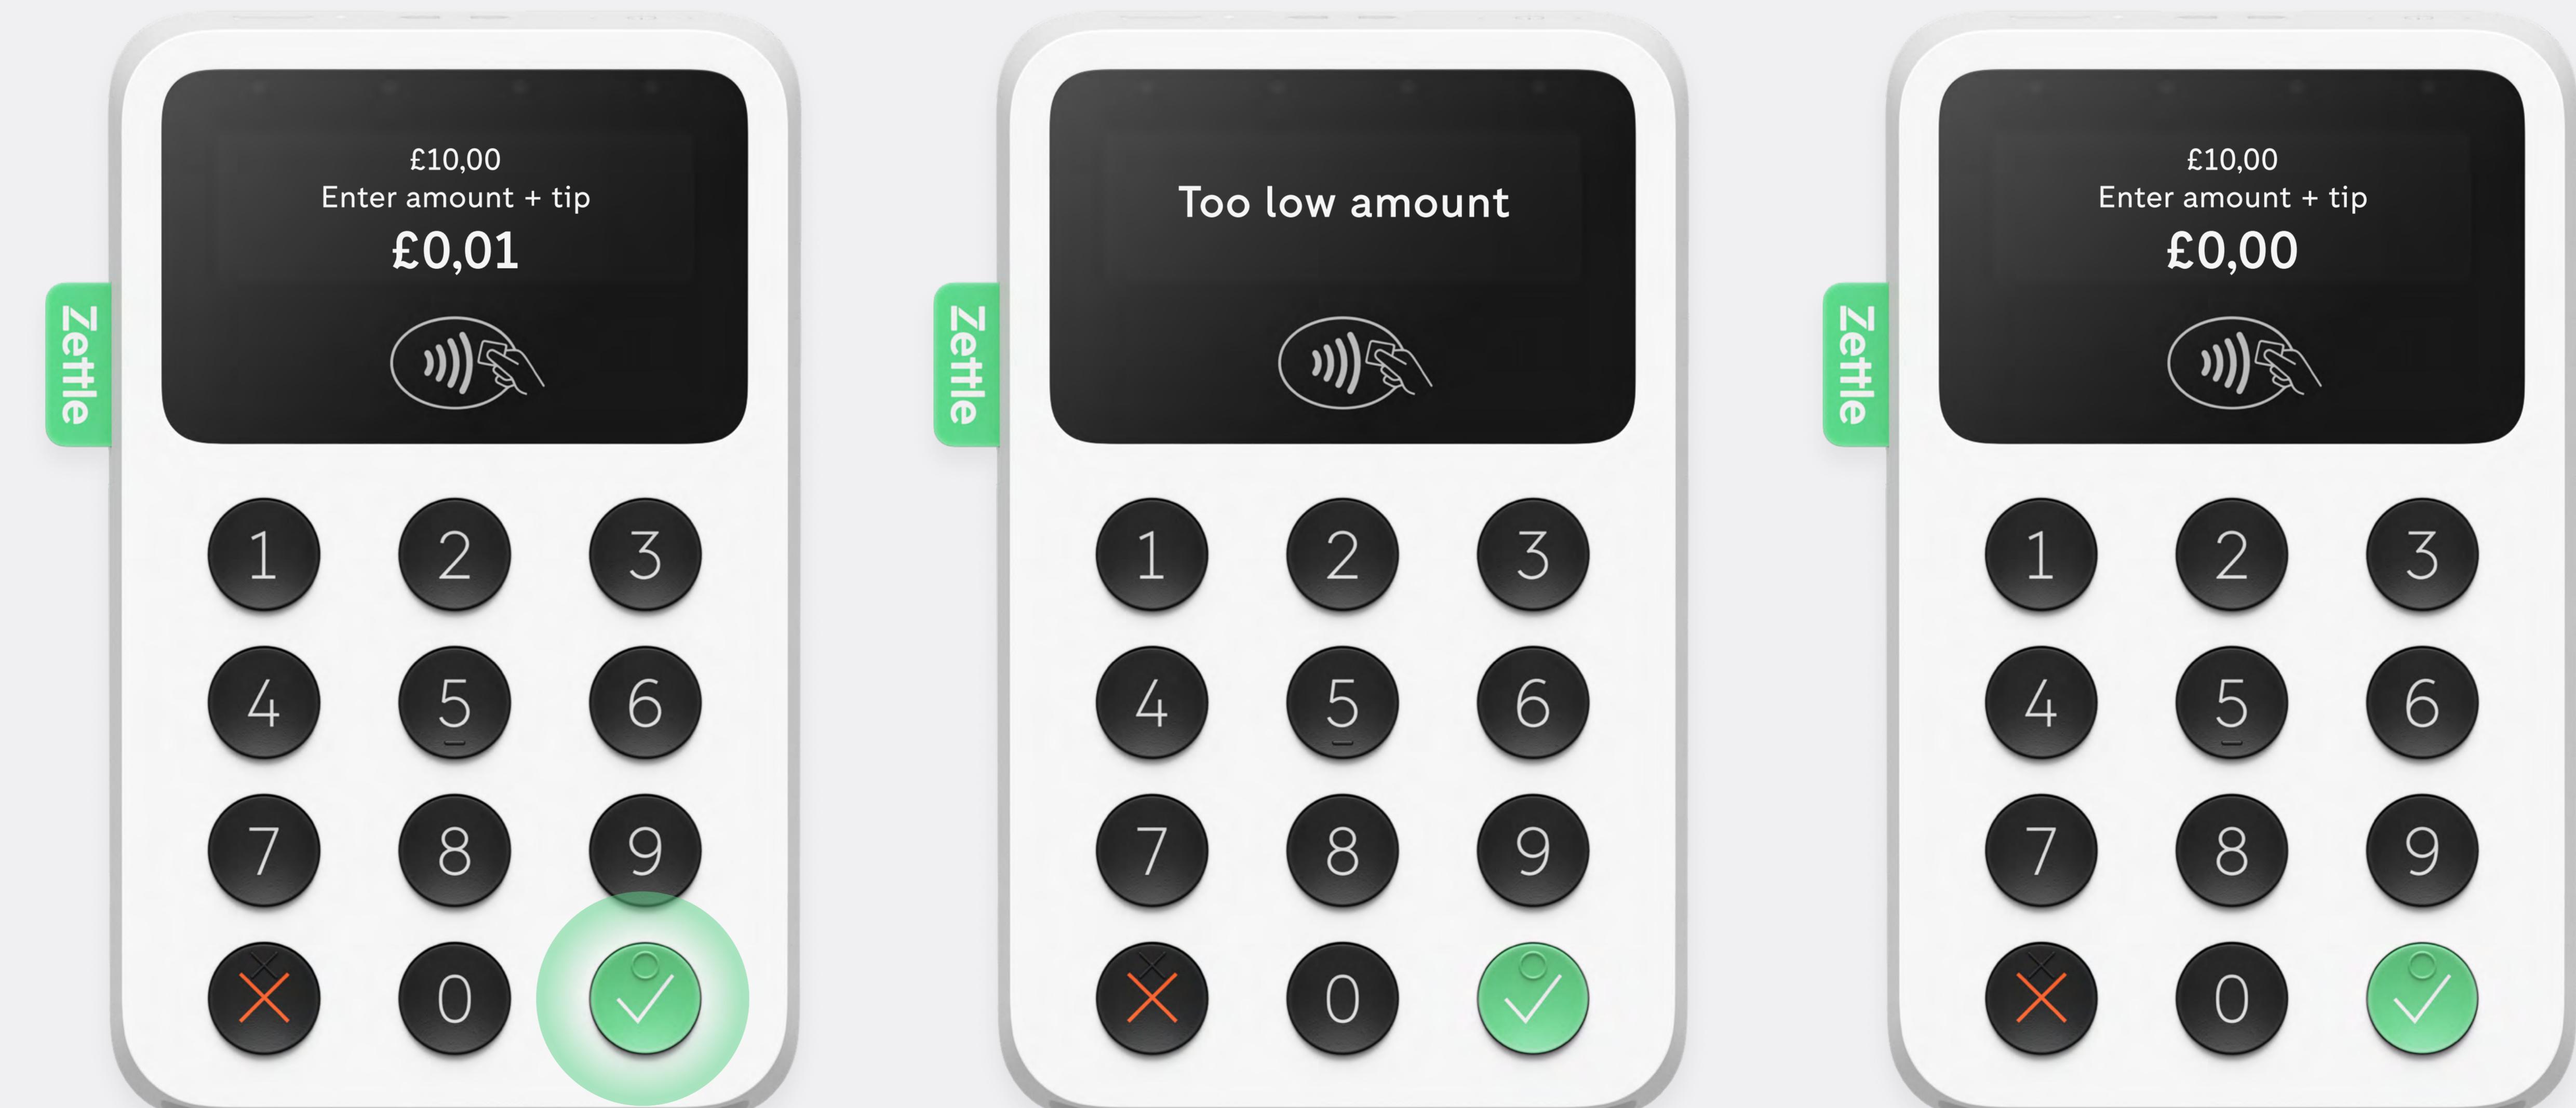

Warning message, time out
after 3 sec.

Too low amount

If less than original amount the reader and SDK will inform the users and after a time out the paying customer can enter total amount again.

Warning message, time out after 3 sec.

Warning message, time out
after 3 sec.
